

Men's Jackets

Each of our men's jackets will have one of three fits: Straight, Close, or Comfort. Specially designed measurement features have been developed to complement your riding style and maintain maximum comfort and performance.

Straight Fitting Style

The straight fitting style has a straight cut for riding comfort. The sleeves have a gentle precurved shape to maintain rider comfort on and off the bike.

Comfort Fitting Style

The comfort fitting style is the largest jacket fit with broad shoulders and deeper cut arm holes for the cruiser riding position. An additional panel is added below the arm for increased rider comfort.

Close Fitting Style

The close fitting style is ergonomically cut for sports performance riding. Flex zones and technical stretch fabric panels are added for increased flexibility in the precurved sports-riding position.

Straight Fitting Style Leather Jackets (Numeric Sizing)
